# Solar Heated Geysers

By using a solar heated geyser you can save electricity on 50% to 90% of the heating portion of your electricity bill. Which is  $\pm$  40% of your entire bill. To the average household that can easily be a saving of over R4,000 or more a year.

Note the prices are for the DIY kit form (you need only hire a plumber for a quick hot water pipe connection.)

Installation by us R3,500 plus vat if you require us to do so.

All kits contain the full instruction list and are easy to install yourself.

Delivery 7 - 10 days from payment of deposit
